## What do we mean by xPower?

Replacing the popular Victor Reader Classic and Classic +, these new models are enhanced with additional usability and reliability features to distinguish them as the premium DAISY desktop CD players.

### Consider these new exciting X factors:

#### X1. Replaceable batteries.

The Classic<sup>x</sup> and the Classic<sup>x</sup> + now have a user-replaceable battery. It is no longer necessary to return the player to your dealer for new batteries. You may even want a spare battery for more versatility.

#### X2. Better battery performance.

The battery can be recharged in only four hours! Even better, a fully charged battery will provide 10 hours play time.

#### X3. Easier to use AC power connector.

The connector socket has been moved to the back of the player, making it easier to locate. Its larger size also makes it easier to insert the connector and easily distinguishes it from the headphone and line-out jacks.

#### X4. Power light indicator.

A green light illuminates when the power is on and blinks while recharging.

#### X5. Dedicated Sleep button.

The new models provide a dedicated Sleep key for easy access on the bottom left corner of the player. An amber light just above the Sleep key will come on when Sleep is activated and will blink during the last minute of the Sleep timer.

#### X6. Audio announcement of battery capacity.

The new models will announce battery capacity when you press the INFO key.

#### X7. More visual contrast on the keypad.

The new models come in a darker charcoal gray case to enhance the contrast of the light gray keys. The case still includes the popular integral carrying handle.
